

Certifications

SPS is Part-10 compliant by certification to perform construction and upgrades at your facilities. All our partner Engineering firms have Engineering Certifications for all Canada as required

Safety is of utmost importance to SPS, therefore we comply with National Construction Safety Standards, and have a National Construction Safety Officer on staff.

All our personnel have the mandatory safety certifications to meet and/or exceed your site-specific safety requirements.

Our crews are professionally trained to properly install Enviro BRM structures and blast protection upgrades.
